

PLACEMENT LOCATION

Coventry University placements cover a wide geographical spread taking in the whole of the West Midlands, East Midlands and Thames Valley.

Students should expect to complete the majority of their placements in the region funding their bursary. However, in the interests of ensuring a good balance of experience for every student some mutually beneficial cross use of placements will occur.

Placement providers should be aware that the students may be travelling to locations that they do not know and a general orientation to the area maybe beneficial for the students.
